ABSTRACT

Scholarship is a critical tool to facilitate education for eligible students, especially those who are socially and economically challenged in the state, and bring them on to the mainstream development track. Indian Educational Board processes large amount of scholarship applications every year. Processing these applications is always time consuming and prone to errors due to their current paper, based system of processing. In this paper, an e-Scholarship System was designed and implemented in order to allow students of India apply for scholarship online with the Indian Educational Board.

1. INTRODUCTION

Our project is about registering for scholarship to the students who are eligible to register.

The application was developed using Hypertext pre-processor (PHP), Hyper Text Mark-up Language (HTML) as the front end and MySQL database as the backend. The E-scholarship system provides collecting students information, helpline number, elegibility criteria. The scholarship will be provided based on the marks scored and economic status.

HOME PAGE:

In this page we have registration page , login page , officer login , about and contact details.

ABOUT PAGE:

This page tells about vision, mission, benefits and objectives of this scholarship portal.

CONTACT PAGE:

This page tells the contact details of supervisors.

LOGIN PAGE:

This page contains 4 buttons i.e., two for renewal and two for fresh. On clicking those buttons it redirects to login form which contains username and password.

REGISTER PAGE:

This page contains registration form in which new user has to be registered.

OFFICER LOGIN:

This page contains a login form for admin through which he/she can get the details of registered users.

After successful registration student can login into their account and they can register for scholarship for specified year .In this they can update marks, change password and if they want they can take a print of their scholarship form. Here you will find officer login where admin can know the students details of the selected year. Finally, he/she can exit from the page using logout.

2. IMPLEMENTATION

**********ABOUT.HTML**********

<html>

<body>

<h1 style="color:#a72213;">ABOUT US</h1>

National Scholarships Portal is one-stop solution through which various services starting from student application, application receipt, processing, sanction and disbursal of various scholarships to Students are enabled. National Scholarships Portal is taken as Mission Mode Project under National e-Governance Plan (NeGP)

<font color="red">Vision</font>

National Scholarships Portal is one-stop solution through which various services starting from student application, application receipt, processing, sanction and disbursal of various scholarships to Students are enabled.

This initiative aims at providing a Simplified, Mission-oriented, Accountable, Responsive & Transparent 'SMART' System for faster & effective disposal of Scholarships applications and delivery of funds directly into beneficiaries account without any leakages.

<font color="red">Mission</font>

The Mission Mode Project (MMP) of National Scholarships Portal under the National e-Governance Plan aims at providing common electronic portal for implementing various Scholarships schemes launched by Union Government, State Government and Union Territories across the country.

<font color="red">Objectives</font>

Ensure timely disbursement of Scholarships to studentsProvide a common portal for various Scholarships schemes of Central and State GovernmentsCreate a transparent database of scholarsAvoid duplication in processingHarmonisation of different Scholarships schemes & normsApplication of Direct Benefit Transfer

<font color="red">Benefits</font>

<font color="green"style="text-decoration:underline;">Simplified process for the students:</font>

1: All scholarships information available under one umbrella.

2: Single integrated application for all scholarships

<font color="green" style="text-decoration:underline;">Improved transparency :</font>

1: System suggests the schemes for which a student is eligible.

2: Duplicates can be reduced to the maximum extent

<font color="green" style="text-decoration:underline;"> Helps in standardisation :</font>

1: Master data for Institutions and courses at all India level .

2: cholarships processing

Serves as a decision support system (DSS) for Ministries and departments as up-to date information will be available on demand.

Comprehensive MIS System to facilitate monitoring every stage of Scholarships distribution i.e. from student registration to delivery of funds
